Training Tips

16 Week Intermediate 21km Training Program

The Hawke's Bay Half-Marathon course is held over a mainly flat course but covers a multitude of terrains including road, bike trails and through vineyards, so make sure you try and emulate that in your training as much as you can for the best results on race day.

Always train within your own capabilities and get a clean bill of health from your doctor if taking on the half-marathon distance for the first time. This program is a 'guideline' only and aimed at those looking to complete their first half-marathon. Ideally you should be able to run for 40 minutes or 8km non-stop before starting this program

We recommend that you add a session of strength training and/or yoga or Pilates (for core strength and flexibility) into your week to fully compliment your half-marathon training. Running three times a week will give you enough 'time on feet' to get to that finish line, but adding in either a 4th easy run or a cross training session, would be ideal if you can.

Finish each run with a few minutes of foam rolling and then static stretches for quads, hamstrings, calves, ITB and glutes for the best results. And make sure that the first 5-10 minutes of each run are used as a 'warm up', so go easy to gradually increase your heart rate and get blood pumping to the muscles where it's needed.

Stop if you're experiencing any unusual pain or niggles and get them checked out. And don't be afraid to take a rest day if you're feeling too tired. Backing up your training with good nutrition and plenty of sleep will give you the best results.

Longer runs over 90 minutes are ideal for you to practice how you will hydrate and fuel during the half marathon. A good habit to get in to is trying to

take on fluid every 30 minutes or so (drink to your thirst) and some fuel every 45-60 minutes. Everyone is different so use these longer sessions to work out your optimal fueling and hydration.

The following training zones are used in the program:

- LA = Lower Aerobic - easy paced running, can talk comfortably and you finish feeling great.
- MA = Mid Aerobic - comfortable running pace, can talk comfortably but breathing has increased.
- UA = Upper Aerobic - comfortably hard running pace, should be a bit breathless.
- RP = Race Paced running (your proposed pace on race day)
